دبشري سرچينولوى امریت  
Islamic Republic of Afghanistan  
1 Telecommunications Regulatory Authority

## **Job Announcement**

**Position:** ICT (IT/ITeS) Advisor to the Board  
**Organization:** Afghanistan Telecom Regulatory Authority (ATRA)  
**Reports to:** ATRA Board  
Announce date: 26/ march/2020  
Expiring date: 11/April/2020

### **Job Summary:**

The ICT Advisor will be responsible to advise and support the coordinating and orchestrating the daily ICT operation within the ATRA and its stakeholders. The resource will advise the ATRA Board Members with new and innovative ideas in the ICT sector. Draft ICT strategies, assess currently developed policies and procedures for the organization and the sector, and recommend best practices and international standards to help ensure transparency and resiliency in the ICT sector.

The overall goal of the role is to, through working closely with the ATRA Board and departments, help establish and achieve a standardized, affordable, safe, secure and reliable ICT ecosystem for the government, businesses, and the citizens of Afghanistan. The role will support the facilitation of the rapid development of affordable, high-quality ATRA services to the entire population of Afghanistan by supporting a transparent, non-discriminatory and legal-regulatory framework that encourages the promotion of the private sector and its participation in the adoption of state-of-the-art services and solutions to the public.

### **Duties and Responsibilities:**

1. Research and propose best practices on ICT design and development of a standardized, affordable, safe, secure and reliable industries, services and solutions, and the ICT ecosystem.
2. In line with the IT Industry Development Policy identify and propose internationally recognized standards and best practices for ICT industry growth and development
3. Support the ATRA IT/CIO, relevant departments, and stakeholders to develop and adopt suitable technologies, processes, based on the requirements of ATRA.

4. Help to support public-private partnership and engagement through technical and operational cooperation and contribution in order to enhance the resiliency of the ICT sector and of the IT/ITeS industries in the country.
5. Develop and propose a mechanism to help standardize (test, certify) and improve ICT and other relevant technologies in the country.
6. Help develop regulations and frameworks for VoIP, OTT, the Internet of Things (IoT), Big Data, mobile money (Mobile Payments/-Transactions) and other relevant technologies and services.
7. Help encourage public-private partnerships in the ICT sector, boost and maintain international cooperation.
8. Develop and propose mechanisms/solutions to safeguard data privacy of government, businesses, and citizens by enabling protection mechanisms for data at rest and data at transit.
9. Advice on how to protect ATRA, government and private ICT infrastructure, secure cyberspace for the citizens, improve and retain cyber security professional skills.
10. Help establish a framework for information safety and assurance, and draft information and other relevant security policies.
11. Develop and implement disaster recovery plans for ATRA, the government and private critical information infrastructures in the country.
12. Help enable and strengthen effective prevention, investigation, and prosecution of electronic crimes (mobile data), illegal activities, and advice on enhancing the law enforcement capabilities through effective data security legislation.

#### Education requirements:

At Least a bachelor's degree in engineering, relevant ICT field, or another relevant field, certifications in network, information and security with at least 5 Years of experience in technology managerial position.
